Light for offices and communication

Users at the heart of contemporary office environments

Enhancing the sense of wellbeing

A successful lighting solution creates visual conditions that make people feel at ease. It should motivate them and help them concentrate on what they need to do. Parameters such as uniform illumination of task areas, bright walls and ceilings plus a pleasant atmosphere can have a direct impact on the physical and mental wellbeing of individuals.

Creating identity

Lighting scenes that can be adjusted to meet user preferences by means of variable colour temperature and light intensity help increase employee satisfaction and create identity. High-quality product design and architectural lighting design also play a significant role.

Reducing costs

Energy efficiency, long service life and lighting management systems enable lighting solutions to play a key role in reducing overall operating costs. The reputation and importance of a company or building will also benefit from a sustainable approach.

A Flagship Zumtobel Project in India

Ardor is an experienced company that has been supplying high quality detergents, petrochemicals, polymers and other inorganic chemicals for the last five decades. Working closely with Design Module and associated lighting systems, Zumtobel created a series of lighting concepts in the office area. A 250 meter run of SLOTLIGHT, in combination with free-standing luminaires such as KAREA, ensures an effective working environment in the open plan areas. VAERO, LIGHT FIELDS, CAPA and LANOS were specified for the specialized corporate areas, creating a calm and pleasant atmosphere.

The Ardor office reflects the latest trends in the office application. The project has been tastefully realized with artistic interiors, ergonomic furniture and high quality lighting solutions that combine innovative luminaires with the intelligent lighting controls. Zumtobel worked with Steelcase, a global leader in office furniture, to engineer a series of unique solutions, including free-standing luminaires that are integrated with the furniture to further accentuate the high-quality interior design.
