

5

**YEAR GUARANTEE**

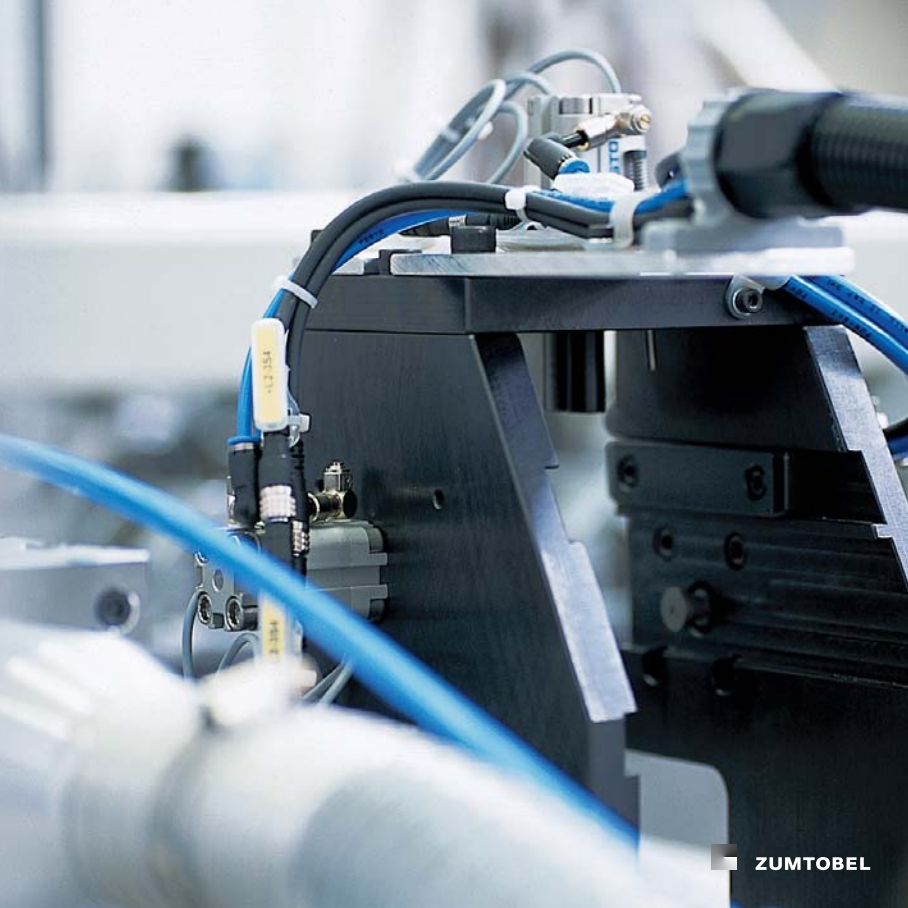

Top quality – with a five-year guarantee.

As a globally leading luminaire manufacturer, Zumtobel provides a five-year guarantee for its complete product range with effect from 1 April 2010.

# ISO 9001

We put a special focus on superior quality in the manufacture of our products. Hence, all Zumtobel plants have been certified according to the ISO 9001 quality standard and have also been awarded relevant certifications according to the ISO 14001 environmental standard. We focus on sustainability from the onset: by complying with high standards already at the manufacturing stage, we reduce the luminaires' failure rate. For products manufactured according to high quality standards are efficient and durable.

# DESIGN

Thanks to Zumtobel's superior design standards, we are the preferred partner for long-lasting lighting solutions that are not influenced by short-lived trends. By extending our product guarantee to five years, we put special emphasis on our long-term thinking to the benefit of our customers; we are the first company in the luminaire industry to commit ourselves to these high quality standards.

# LED

Especially in view of the rapid development of LEDs, the focus is increasingly shifting to quality and service life. For one of the aspects that make LEDs especially attractive is their service life of up to 50,000 hours. However, this can only be achieved if the LEDs are integrated into a technically advanced luminaire with an efficient cooling system and sophisticated components. Zumtobel has the full expertise to develop and manufacture high-quality luminaires featuring state-of-the-art technology and durable design.

# GLOBAL PLAYER

A 5-year guarantee granted by a major manufacturer with a sound financial basis makes customers feel reassured that they have obtained a sustainable lighting solution. Just as important as the sophisticated development, design and testing processes is the financial situation of the manufacturer promoting such a long service life.
