

ZUMTOBEL

SLOTLIGHT ROUND

A LUMINOUS BEACON OF TRANQUILITY

NO BEGINNING. NO END.

Thanks to its design, the surface-mounted and pendant luminaire rounds off the SLOTLIGHT portfolio in the most literal sense. The luminous circle is an emotive eye-catcher that enhances entrance areas, offices, meeting and recreation rooms, canteens and retirement homes. And you can have more than one, of course. SLOTLIGHT round combines aesthetics and functionality, using direct and indirect light, high luminous flux and good glare control to handle challenging visual tasks and create a pleasant atmosphere.

SLOTLIGHT round acoustic

combines maximum lighting quality from Zumtobel with effective sound absorption and contemporary design.

The felt-look fleece cover adds a stunning material effect to the room while providing effective sound-wave absorption. The fleece has a recycling rate up to 60 per cent.
