LED SHELF LIGHT system

Magnetically fixed, no tool required: the flexible batten luminaire for supermarkets.
Invisible  Brilliant LED light shows products off to perfection, the elegant luminaire taking a back seat. Rather than drowning shelves in wide-area lighting, SHELF LIGHT provides just the carefully dosed right amount of light for each shelf bay, thus focussing the light on the merchandise. The customer’s attention is drawn exclusively to the items that are on sale. This creates perfect conditions for selectively setting an upmarket product line centre stage in a supermarket: goods are aesthetically enhanced, and even heat-sensitive products such as chocolate or cosmetics can be staged by gentle illumination. With colour temperatures of 3,000 and 4,200 K, SHELF LIGHT makes it possible to use the appropriate light colour to emphasise the natural colour of products.

SHELF LIGHT product line
The LED SHELF LIGHT system is available in four versions that cater for a variety of situations and requirements. Versions in two different lengths are designed to match the standard lengths of commercially available supermarket shelving.

CONVERTER SET
22 166 793 (2 m track + converter)

Safe
Even the track can be fitted entirely without tools. Powerful magnets attach the track securely to the shelving unit. A connector that is protected against polarity reversal and safety extra-low voltage (24 V) make installation extremely straightforward, even for a non-electrician.

SHELF LIGHT dimensions
Match standard shelf lengths

Converter
Output voltage 24 V
Max. output power 150 W

Track
Two metres long, with magnetic attachment points for no-tool fixing on shelf

SHELF LIGHT
LED lighting module

Side view  Front view

The luminaire and track are magnetically fixed to the metal shelf and the control gear is housed at the base of the shelf. One unit can supply up to seven luminaires.

SHELF LIGHT is fixed behind the shelf rebate, invisible to customers. The customer only sees the light – and the goods.
The SHELF LIGHT system makes it possible to use the cosmetics can be staged by gentle illumination. With colour temperature and even heat-sensitive products such as chocolate or upmarket product line centre stage in a supermarket: goods are aesthetically that are on sale. This creates perfect conditions for selectively setting an elegant luminaire taking a back seat. Rather than drowning shelves in the light, LED SHELF LIGHT shows products off to perfection, the customer bate, invisible to customers. The customer is really simple to detach a SHELF LIGHT luminaire from a shelf and use it in a different location. The connector is protected against polarity reversal; the luminaire is powered by safety extra-low voltage; both elements make installation straightforward – even for supermarket employees. This means that lighting can be adapted quickly and without technical changes without notice. We reserve the right to make technical changes without notice. We reserve the right to make technical changes without notice. For the sake of the environment: Please contact your local sales office for new shelving layouts. Not only that – SHELF LIGHT is sustainable made from recycled material. Even the track can be fitted entirely without screws or adhesive tape. Magnetic fixing also ensures extreme flexibility.

**Magnetically fixed**
A new level of SHELF LIGHT flexibility

**Completely tool-free** Installing a SHELF LIGHT solution is child’s play. The luminaire and track are fixed magnetically, there is no need for any screws or adhesive tape. Magnetic fixing also ensures extreme flexibility. It is really simple to detach a SHELF LIGHT luminaire from a shelf and use it in a different location. The connector is protected against polarity reversal; the luminaire is powered by safety extra-low voltage; both these features make installation straightforward – even for supermarket employees. This means that lighting can be adapted quickly and without fuss to cater for new shelving layouts. Not only that – SHELF LIGHT is also ideal for retrofitting into existing shelving systems.
