

ZUMTOBEL

# *highlights*

*Product innovations and additions*

Edition 2/2018

member of zumtobel group

### *Are you connected?*

*The Digital Revolution offers endless ways to network.*

*The result: unprecedented interaction in  
terms of pace, scale and intensity.*

*But what about the one connection that truly defines us?*

### *Our connection to daylight.*

*Active Light from Zumtobel restores our link to  
natural light – a relationship that shapes well-being,  
mood and even health.*

*This is not light to see. Subtle changes in colour and  
intensity delivered by tunableWhite solutions make  
this light to live.*

*Now flexible tools like the new SUPERSYSTEM integral  
collection help you rediscover this fundamental connection.*

*And improve life with light.*

SUPERSYSTEM | integral collection

[zumtobel.com/supersystem](http://zumtobel.com/supersystem)

## *SUPERSYSTEM integral collection*

The ultimate set of architectural lighting tools

Nominative determinism: when an outcome is driven by a name. Just like with SUPERSYSTEM integral. This comprehensive range of miniaturised tools fuses pure integrated design with maximum adaptability. Seamlessly. Like never before.

### **Adapting to the application and the architecture**

Horizontal, vertical, accent and indirect lighting – all the tools a lighting designer needs. All with excellent glare control. And the same refined look from renowned Austrian design studio EOOS. A slim track ensures full integration of all lighting components – and offers a refurbishment solution that is both handy and handsome. Full integration into the ceiling and the architecture can also be achieved. Look carefully to find it. Or choose a standalone version. Or perhaps even one of the unique synchro gimbal fittings.

The result: visual quality and lighting quality. Plus various colours. Along with DALI and basicDIM wireless via Bluetooth for added adaptability.

*SUPERSYSTEM integral.*

*It really is all in the name.*

## *Retail* Additions

### **PANOS infinity tunableWhite**

Integration of LED tunableWhite technology

High efficiency and increased dynamics:  
PANOS infinity tunableWhite creates different shades of white to imitate natural daylight and support our natural biorhythm. The calibrated system ensures outstanding light quality (CRI90 SDCM 3).

**ONICO M intrack**

A small luminaire with big performance

In line with the idea of uniform variety, ONICO M intrack further extends this luminaire family – with the same high performance as the L version. All components are tucked away in the track to make sure that no converter box compromises the clear design concept.

## Office Additions

### **LINETIK suspended**

The next level of miniaturisation

With aesthetic mounting and a delicate look, LINETIK suspended seems to float in the space. The first thing that catches the eye is the ultra-slim design, with a cross-section of just 25 mm. Yet soon the brilliant visual comfort, perfect glare control and high light quality begin to impress – thanks to premium optics. Available in black, silver and white, LINETIK suspended blends into any office architecture.

**MIREL evolution and MELLOW LIGHT infinity/evolution**  
Office solutions upgraded

MIREL has a new lick of paint: The office luminaire can now also be specified in black. With an increased colour-rendering index of more than 90, MELLOW LIGHT lives up to its reputation and delivers optimum light quality for intricate work.

## Office Additions

### **ONDARIA**

A timelessly beautiful solution for a special kind of illumination

Now available with a diameter of 400 mm:

The decorative round ONDARIA luminaire family puts walls and ceilings in the perfect light – with striking looks and flawless illumination of the opal cover. The design possibilities in terms of installation and optics are endless.

#### **SLOTLIGHT I / SLOTLIGHT II LED batten**

Modernisation made easy

Looking to swap T16 for LED? Then look no further. A new LED batten means that all T16 SLOTLIGHT I and II fittings can easily be 1:1 retrofitted – using the existing installation channels. The LED batten fits perfectly into all SLOTLIGHT luminaires.

## Industry/Emergency lighting Additions

### **AMPHIBIA**

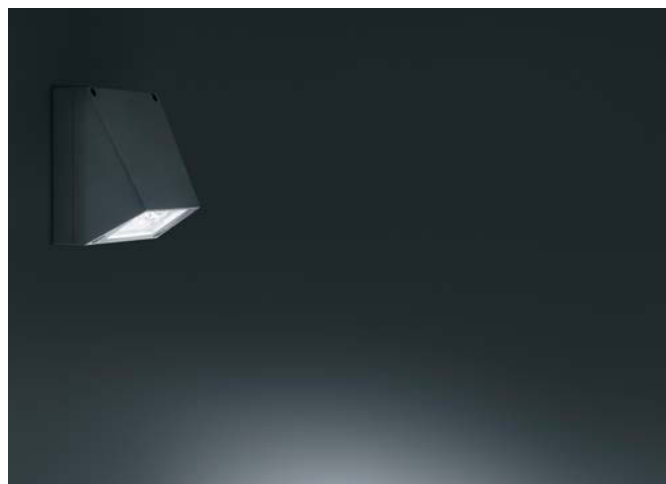

Additions to the new LED moisture-proof range

AMPHIBIA can be mounted quickly and easily on TECTON trunking with the addition of the long-awaited TECTON adapter to the standard portfolio. The AMPHIBIA LED moisture-proof range also now includes a 10,000-lumen version and a round AMPHIBIA fitting with a completely transparent housing.

### **RESCLITE PRO**

Renewal across the range

RESCLITE PRO adds fresh impetus to the world of emergency lighting. Alongside new central-battery options, single-battery versions with an 8-hour emergency power supply and NFC addressing are also now available. RESCLITE PROtect incorporates battery heating and robust materials to provide the ideal solution for outdoor areas and cold stores.

# Efficiency upgrade

		Luminaire efficiency factor	Installed load
	<b>SLOTLIGHT</b> Replacement	up to 125 lm/W ~ 20%	~ 7-18 W
	<b>OPTOS</b> Downlight	up to 114 lm/W ~ 28%	~ 5-20 W
