

A Light Less Ordinary...

During his landmark address*¹ in 2006, Professor Peter Boyce*² stated that :

Current lighting practice is justified by the need to ensure good visibility and avoid visual discomfort.

Lighting can be classified as bad, indifferent and good.

Providing good visibility and avoiding visual discomfort are actions necessary to provide indifferent lighting but are not sufficient to guarantee good lighting.

We need to educate the purchasers and users of lighting about its benefits beyond visibility and visual comfort.

*1 The Trotter Patterson Memorial Lecture, created in 1951 to commemorate two distinguished past Presidents of the Illuminating Engineering Society, Alexander Trotter (President 1917-1920) and Sir Clifford Paterson (1928).

*2 Ph.D., FSLL, FIESNA, Past Professor Emeritus at The Lighting Research Center, Rensselaer Polytechnic Institute, and one of the world's foremost lighting researchers.

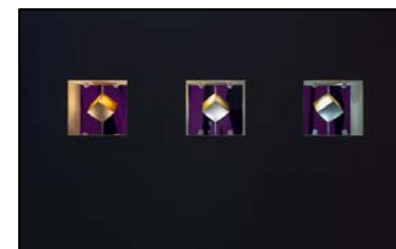

A Light Less Ordinary Symposium*

A Light Less Ordinary will explore:

Lighting for Humans

Lighting for Purity

Lighting for Inspiration

- * *n. pl.* **sym-po-si-ums** or **sym-po-si-a**
1. A meeting or conference for discussion of a topic.
 2. A collection of writings on a particular topic.
 3. A convivial meeting for drinking, music, and intellectual discussion.

A Light Less Ordinary Symposium

For Humans :

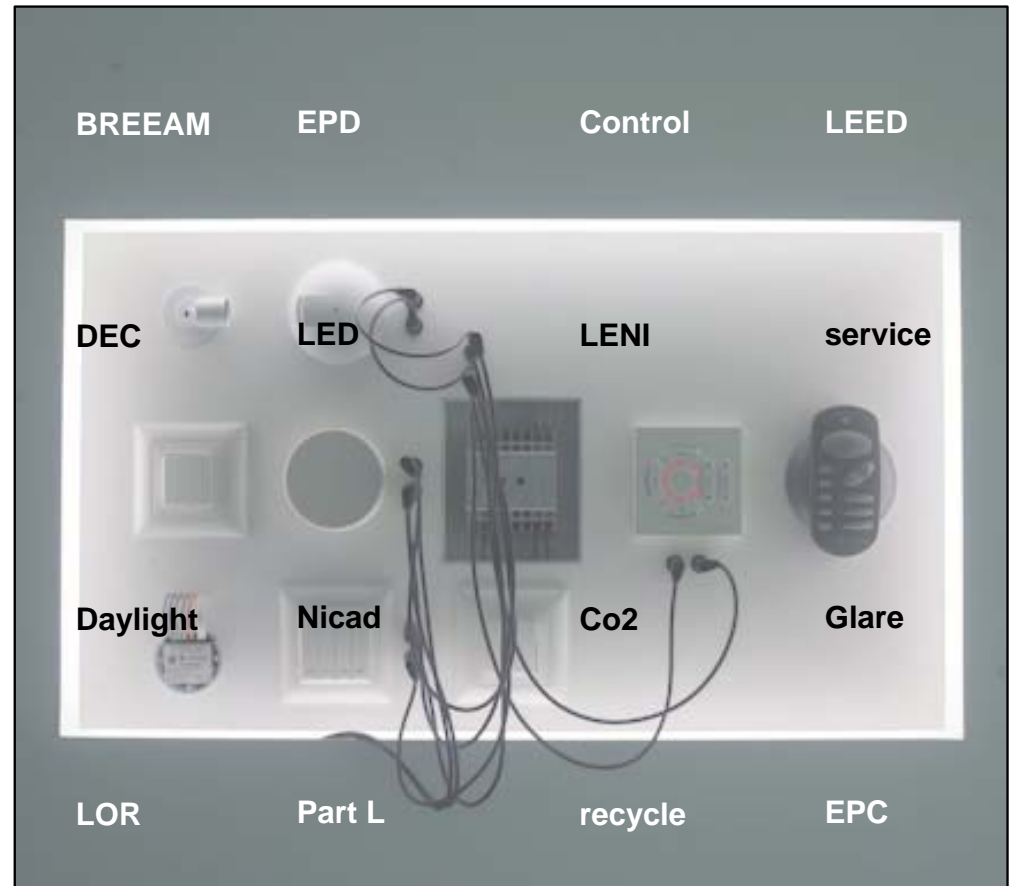

The physiological, biological and psychological effects of light, whether daylight, artificial light or a combination of both.

For Purity :

Minimising materials, degradation, energy, guides and legislation.

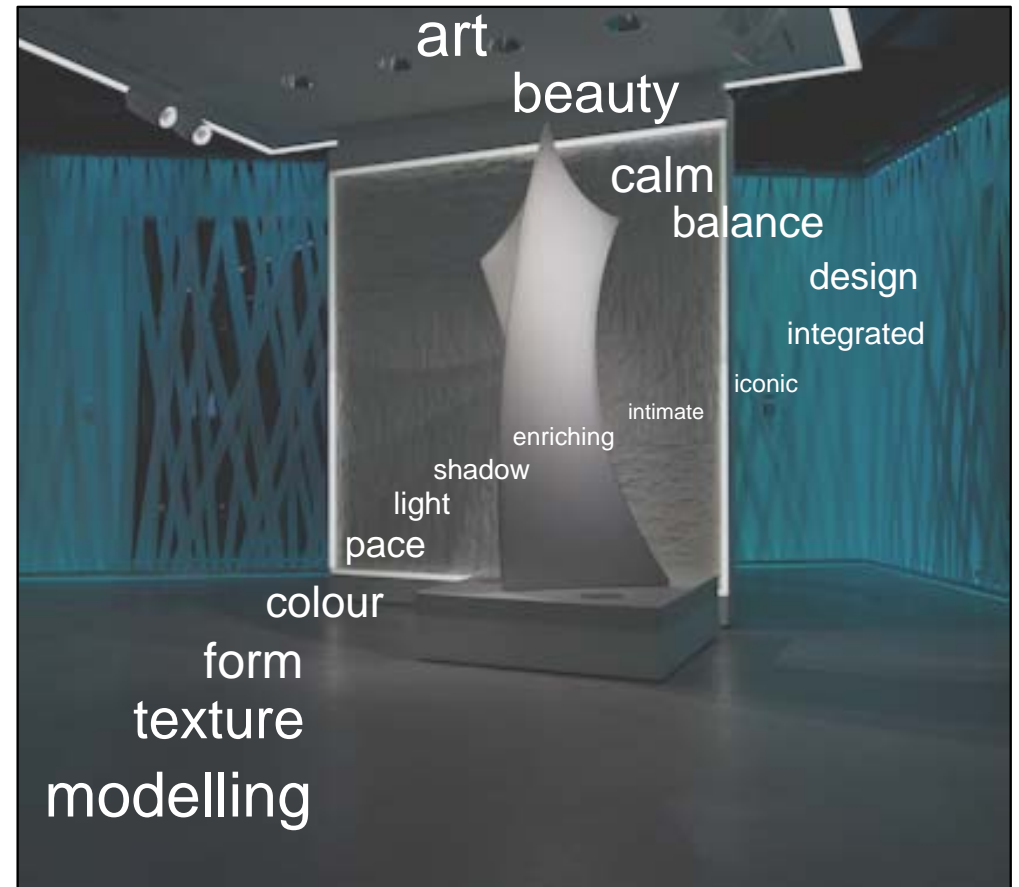

Technical factors, compliance and through life project performance.

A Light Less Ordinary Symposium

For Inspiration :

A space only becomes architecture with light.
Lighting for personality, vibrancy and
materialisation.

A Light Less Ordinary Symposium

Using our state-of-the-art App Spaces we will take you on a journey through light, beyond visibility and visual comfort, to show what a difference lighting can make.

With our passion for lighting, and a healthy helping of discussion and debate, we are sure that *A Light Less Ordinary* will provide a valuable contribution to your knowledge base.

Our Symposium is educational in nature and CPD accredited*, and is suited to any Professional engaged in the selection or specification of lighting solutions, or simply for those with an interest or love of light!

Please contact your local Project Engineer to organise a visit.

We look forward to seeing you all soon.
